

>> **ACCURACY** BOOSTS CUSTOMER CONFIDENCE WITH

eVerify | Barcode

**ORDER ACCURACY:
Barcode Verification
Quality Control**

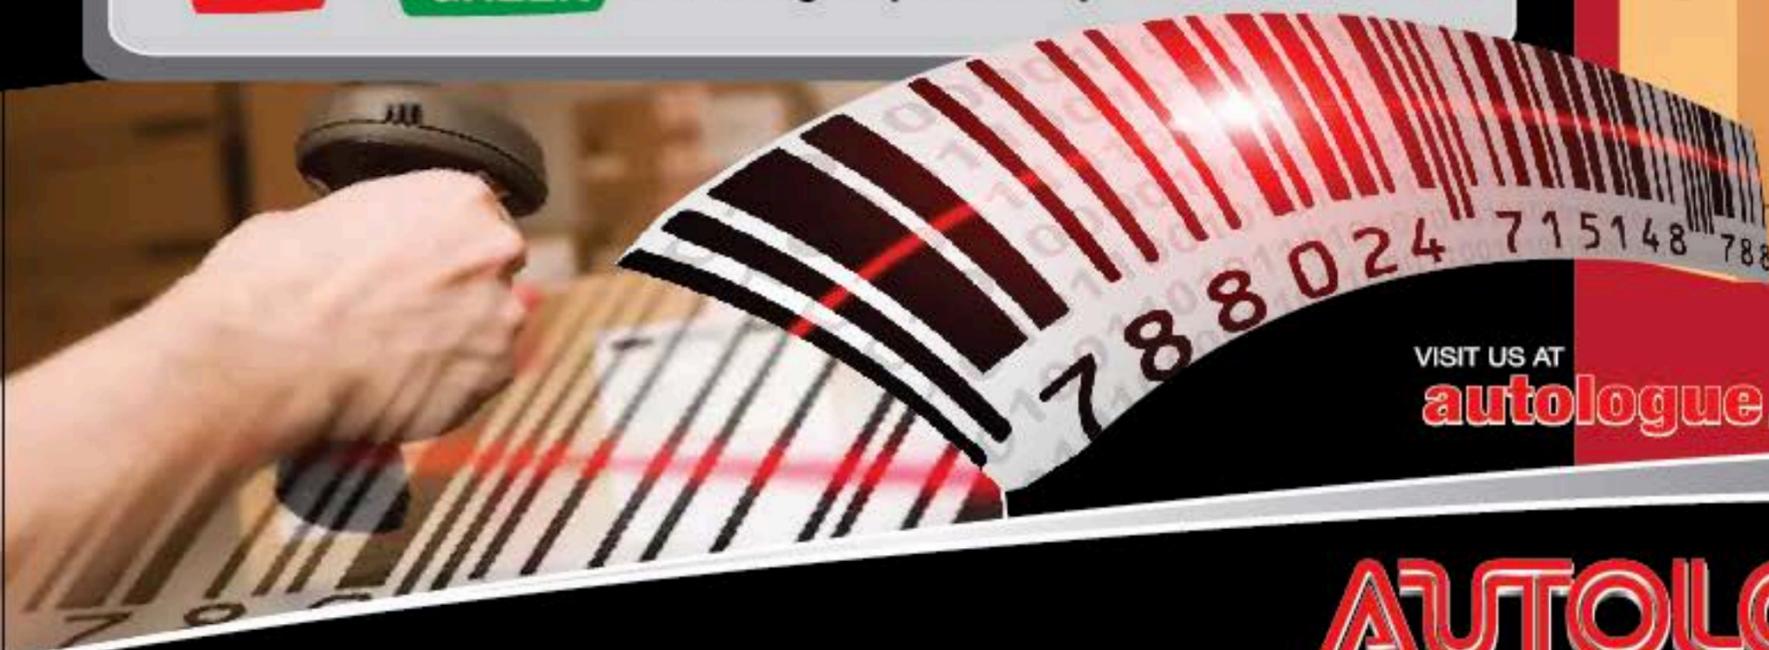

Get the right parts to your customers 100% the first time.

It's so beneficial, yet so simple:

- ▶ **SCAN THE BARCODE ON THE INVOICE** using a tethered, inexpensive barcode reader. This electronically pulls that invoice from eOffice to a local PC.
- ▶ **SCAN ALL THE PARTS – IN ANY ORDER** after parts are picked and placed on the staging area.
- ▶ **VERIFY PARTS** – As items are scanned the screen turns from **RED** to **GREEN** indicating all parts are present and verified.

Integrates to
all major
Management
Systems.

Autologue's eVerify is designed to effectively verify orders via scanning barcodes before they are shipped or delivered. After an order is picked, a verifier will scan the invoice being verified and each part that is being shipped or delivered. The program tracks the start time the invoice was first scanned, the picker then retrieves all the parts on the order and then each piece is scanned and verified with items ordered. If there are any notifications regarding discrepancies, a verification report can be printed with these exceptions.

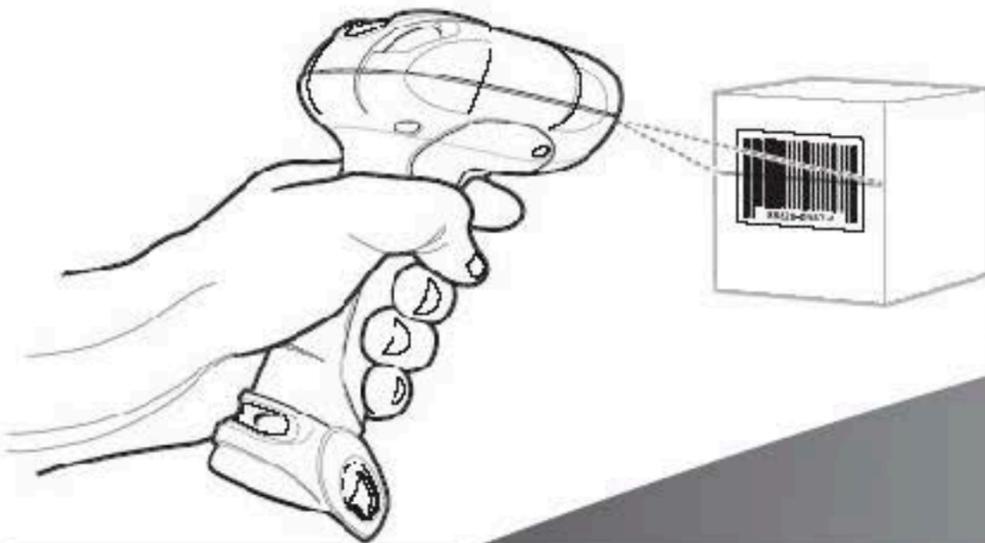

Here is a summary of the Features and Benefits eVerify offers:

Quality Enhancing Features

- **Easy to use** hand-held barcode scanner
- **Orders are processed more efficiently:** After an order is picked, a verifier scans the barcoded invoice and parts
- **You can track** the time, the verification reporting and accuracy of the QC process.
- **Notification alerts** of discrepancies regarding parts, stock variances — allow correcting these issues before ANY problem occurs.
- **Generate a Verification Report** to track and list any exceptions, corrections and the completion of the QC process.
- **A log screen pop up** displays the start and end times of the verification — improving personnel accountability.
- **Screen displays** pertinent checkpoint guides: Verified Quantity, Verified and Out of Stock Inventory.
- **Promotes more efficient work standards** and an effective quality-control process for your staff and your business.

Performance Proven Benefits

- **Eliminates errors** on ALL orders before ANY part leaves the building to ship or deliver.
- **Satisfied customer ratings will positively improve** as these orders consistently deliver 100% right the first time.
- **Build Customer Loyalty** as your improved standards of consistent, error-free service continues.
- **Increasing profits:** You, as well as your customer, save money / time by eliminating labor duplication, part return downtime and repeated shipping and delivery costs.
- **Customers can work more efficiently** when they receive the right part the first time.
- **Customers will increase service** repair turn times and billings with your accurate deliveries.
- **More precise accounting:** As barcoding is completed, the quantity is incremented for verification on the invoice & quantity inventory
- **Build valuable CRM** — increase customer confidence and strengthen your business relationships.

Optional eDeliveryTracking Available

View delivery status, invoice and parts being sent/delivered, time ordered, time printed, time dispatched and delivery received time.
